

ARC (Active Race Control) System

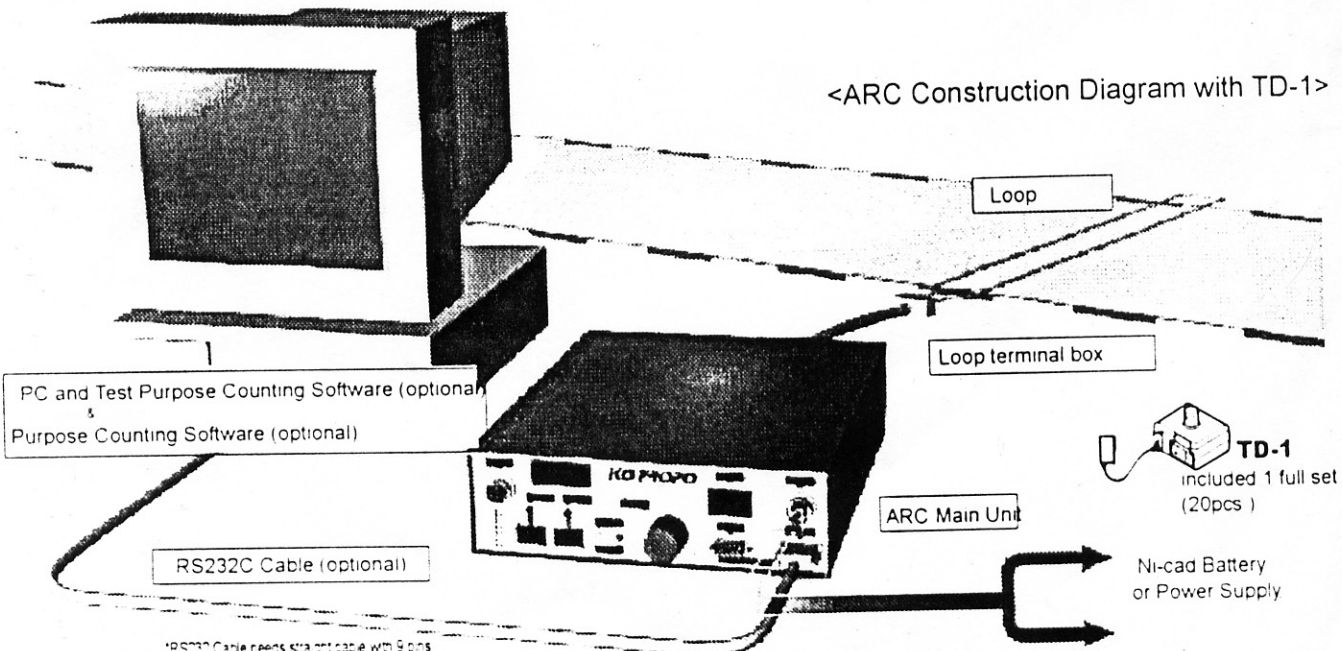

TD-1 Compatible Instruction Manual Rev1.0

<FEATURES>

- Accurate counting with the new TD-1.
- The New TD-1 is maintenance free i.e. no charging.
- Ordinary lead wire can be used as the loop. Therefore it can be installed on the surface, buried in the ground or on a bridge over the ground.
- One main unit can be used for up to 20 cars.
- Extension function can be used for future options.
- Energy saving that allows approx. 4 hours operation with 8.4V 2000mAh Nicad battery. (optional)
- Ordinary lead wire can be used therefore easy D.I.Y is possible for course condition.
- Easy to use and accurate counting with simple design.
- Connect to your PC with RS232C cable and can be used with commercially available software for accurate lap count and lap time counting and race results.
- Counting software for testing is included.
