This product is a precision instrument that uses internal electronic parts. Wrong use and the storage method may damage the product. Not only will this cause the breakdown, but also cause an unexpected accident and/or danger. Please refer to the handling explanation in the manual to prevent such a situation.

**Danger** From the content to which it is assumed, danger of causing death or the serious injury may occur.
**Warning** The content where the possibility of owing the death or the serious injury is assumed, and a sudden disadvantageous accident occur at high frequency.
**Caution** The content to which it is assumed, only a possibility or a sudden disadvantageous accident that occurs may be due to troubles by usage.

---

**How to remove battery cover**
- While lightly pushing the part of (1), move direction of (2).

---

**Troubleshooting**
- Please confirm the battery direction when a set content is not displayed.
- Even if the display doesn’t appear or if the power supply is turned on. Make sure the setting card is connected and confirm the connection of the setting card.

**When repairs are requested**
- Please include the content of the usage condition when the unit has broken down, symptoms, your addresses, name, and a contact phone number(s) in writing.

---

**The main spec**
- Four Power supply: AAA type dry battery x4
- Current consumption: About 25mA (main unit only at 6.0V)

---

**Multi setting adaptor manual**

---

**Connection of setting card**

To be able to set the equipment for L.C.S, you must connect the setting card with the multi setting adaptor. It is not possible to set it with the multi setting adaptor unit. Moreover, it will not operate even if each key is pushed. In that case, only "KO PROPO" is displayed in the LCD panel. The setting card is different for hardware that is used. Buy the hardware according to the model that uses it. With the power supply turned off, connect the unit and make sure that all the connection ends are correct.

Then power supply should be turned on. Moreover, please turn off the power supply when the connection is removed.

Please read the operation explanation of the setting card when setting are made.

The data communication connector must not be touched directly by the hand etc. There is fear of the element destruction etc. by static electricity.

---

**Each part name**

---

**Inserting batteries.**
So as not to make a mistake, the dry battery of the AAA type is put in the direction of right figure.

---

**Connections etc. by static electricity.**
